

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-12 (canceled)

13. (New) A hand-held device having a functionality for creating a projection of visual information onto a surface under control of a stabilizer for stabilizing the projection for a motion of the device, the device comprising a component for creating in the stabilized projection a visual indicium that is moveable with respect to the projection under user control of an orientation of the device, wherein the component comprises a controller for controlling the location of the indicium being a part of the projected visual information.

14. (New) The device of claim 13, comprising a confirmation input for confirming a selection of a location in the projection occupied by the indicium.

15. (New) The device of claim 14, comprising a communicator for communicating the confirming of the selection to a source external to the device.

16. (New) The device of claim 14, comprising a remote controller for enabling remote control of an operation of the source by associating a position of the indicium with a selectable item represented in the projection.

17. (New) The device of claim 14, comprising a browser and wherein the communicator enables wireless access to a data network.

18. (New) The device of claim 14, comprising a file system for organized storage of electronic files.

19. (New) The device of claim 13, configured for playing a computer game for which the projection forms a visual feedback.

20. (New) The device of claim 19, wherein the indicium comprises an animation.

21. (New) The device of claim 13, comprising a display monitor.
